ABSTRACT

Many of the references in this bibliography are followed by a listing of ERIC descriptors to indicate the contents. The items are listed in six sections: (1) residential learning facilities; (2) user research and implications for student housing design; (3) environment of residence hall and its effect on student performance and behavior; (4) planning, financing, and operating student housing; (5) facility case studies; and (6) examination of student housing concepts and problems. An earlier bibliography compiled in 1968 is ED 025 136. (MLF)

INTRODUCTION

The bibliography which follows has resulted from an investigation of current literature available in the area of student housing. The articles were selected as being particularly good examples of important aspects for examination of student housing. A significant emphasis has been placed on individual student behavior as related to the residence environment as an often neglected but crucial area for making evaluations of existing and future facilities.

Each indexed reference source is followed by an alphabetical listing of descriptors which were selected to describe the subject elements of each document. Major descriptors are the most important descriptors assigned to a given document and are identified by an asterisk. The descriptors used throughout this bibliography are part of the Thesaurus of ERIC Descriptors, which is used for indexing, storing, and retrieving documents handled by the ERIC system.
